

Please reject NAB petition 04-160. There is not a just reason satellite radio should not be allowed to broadcast any of its current offerings. Of course the NAB would like to silence a legitimate competitor to protect its profits. Why should I be forced to resort to NAB programming when I choose to pay for satellite quality and selectivity. Please allow the free enterprise system to work! It will if you let it. Thank you for looking out for the best interests of a free America by letting its citizens decide for themselves what they want to listen to and choosing the source.
